SUMMARY

I am a PhD student at UNSW, commencing my studies in Term 1, 2027. My primary supervisor is Behrouz Taji, and my secondary supervisor is Daniel Chan. Before that, I was a master student at the University of Melbourne under the supervision of Jack Hall. My research focuses mainly on algebraic geometry, particularly moduli theory and birational geometry.

RESEARCH

I am now looking at the moduli of KSBA pairs, projectivity of moduli space...

COURSEWORK IN UNIMELB

24 Semester 2: Algebraic Geometry; Groups, Categories and Homological Algebra;
Differential Geometry

25 Semester 1: Lie Algebra; Measure Theory; Differential Topology

25 Semester 2: Riemann Surface and Complex Analysis; Representation Theory;
Advanced Discrete Math

26 Semester 1: Algebraic Topology; Algebraic Number Theory

Additional (Graduate Study A): Hodge theory and its application to algebraic geometry (24 S2);
Topics in Lie theory (25 S2)

HONORS AND AWARDS

Master's Mathematics and Statistics School Scholarship, 2024 Semester 2

Master's Mathematics and Statistics School Scholarship, 2025 Semester 1

Master's Mathematics and Statistics School Scholarship, 2025 Semester 2

EDUCATION

2024 - 2026 MSc (Pure Mathematics) at **University of Melbourne** (WAM: 85.8)

2020 - 2024 BSc in Mathematics and Statistics at **SCNU** (GPA: 4.19/5.0)

RESEARCH EXPERIENCE

Master research project: Alterations and moduli theory (Thesis supervisor: Jack Hall)

Undergraduate research project: Primitive prime factors in polynomial sequences over finite fields
(Thesis supervisor: Min Sha)

TUTORING

26 Semester 1: Calculus 1 (MAST10005)

LANGUAGE AND OTHER SKILLS

Language: English, Mandarin (Native), Cantonese (Native)

Other Skills: Python, Latex and basic MATLAB
